Hair Dryer Manual

Dear customer:

Xpoliman is a company dedicated to the research of the cutting-edge technology of beauty products, designs and manufactures high-performance hair dressing and beauty products.
Our products aim to bring better experience and convenience to customers, thereby improving people's quality of life and lifestyle.
We are constantly trying to move towards international evolution through continuous development and terms of competitive quotation and outstanding client service.
We focus on the development and sale of unique outdoor and furniture products and accessories, our mission is to enable people to have a more convenient, happy and comfortable lifestyle.

This product is an exclusive tool series incorporate the latest technology to care for your hair and create the most glamorous original and free-and-easy looks. The unique tools will become your best ally to take care of and make your hair look beautiful every day.

Now let me introduce some basic functions and precautions of this product to you.

Precautions:

1. This Blower operates at power supply of AC 110-125V , 50/60Hz

2. Be sure to use power socket up to safety standard and satisfying load requirements.

3. Don't operate this Blower close to textiles and flammable substances (gases)

4. Never operate in moisten ambience or a bathroom.

5. Don't block the air outlet/inlet during operation. A regular cleaning of air outlet/inlet is required.

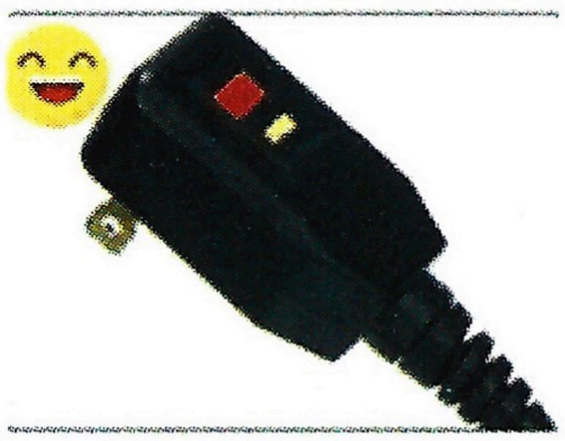
6. This Blower comes with a cold/hot wind switch of three positions: O position indicating OFF, I position indicating WEAK, II position indicating STRONG.

7. The operator shall not leave the Blower alone while it has been powered on. The Blower shall be powered off and disconnected from the power supply after use.

8. In case the Blower or its power cables are damaged, a dedicated tool is required for the repairing or replacing.

9. Never allow a kid to reach this Blower.

Use step and function instructions:



ALCI SAFETY PLUG
UL Approved

1. Connect the plug of the hair dryer to the power outlet. Be careful not to get close to the water source. Make sure the plug is dry before connecting.
Our Hair Dryers with US ALCI safety plug(UL, ETL ,110-125V 60HZ), if short circuit or leakage of electricity happens when use it, Over-heat protections will be automatically activated, which which can keep safe for you and your family.
Use of US ALCI safety plug: Press the red button to turn on the power (factory setting is on), if you need to disconnect the power, press the yellow button. If you want to power on again, press the red button again

2. This product has 3 Heat Settings (Ⅲ High, Ⅱ Medium, Ⅰ Low), which are used for fast hair drying, constant temperature hair care, and gentle blow drying. There are 2 Air Speed Settings (Ⅱ Strong, Ⅰ Medium). There is also a Cool Shot Button.

When you set a certain temperature for blowing, as long as you press and hold the Cool Shot Button, you will get a cool wind, and when you release this button, you will return to the temperature you originally used.

3. If your hair is moist and needs to be dried quickly, set the temperature option to Ⅲ High and the wind speed to Ⅱ Strong.

4. When drying the hair, it is better to clip the hair into layers and start drying one by one from the innermost layer.
5. When the hair is blown to half dry, the temperature can be adjusted to 2 soft blow dry files, using 3 strong warm air, gently dry the hair. When drying the hair, use your other hand to constantly move the hair to ensure that all hair is evenly dried.
6. When the hair is blown to 80% dryness, adjust the temperature to the constant temperature hair care position and the wind speed to the I position. At the same time, change the styling nozzle and press the cold air spray button to obtain cold air to shape the hair.

Tips:

Removable Air Filter

Easy to remove and clean

Double safety net,prevent hair drawn into the duct, keep the dryer always working in high efficiency, easy to clean, durable to use.

If you have straight hair, the 2 Concentrator Nozzles are perfect for blowing your hair;
If you have curly hair, we have a sweet Diffuser for you.

If you smell a slight odor when using this product in the beginning, don't worry, this is normal. Because this product uses high-end U-shaped heating wire, the safety performance is better than other heating wires, but this heating wire has a thin layer of protective oil on it. After a short period of use, this odor will disappear.

This product has passed the US UL-859 test. The product quality and safety are guaranteed. Customers can rest assured to use it. If necessary, we can provide you with a UL-859 test report for this product.
If you have problems using it, please read this manual, or contact us through the order, and you can also email us.
We will solve your problem in the fastest time, thank you.
